What versions of Parallels Desktop are compatible with OS X Mavericks

- Parallels Desktop for Mac Standard Edition

Information

1. **Parallels Desktop 7 for Mac and earlier versions**

   If you intend to upgrade to the upcoming Mac OS X Mavericks (10.9), please note that Parallels Desktop for Mac version 7 and earlier will not support OS X Mavericks (10.9). You will not be able to launch your Windows Virtual Machine or directly use your files through Parallels Desktop for Mac version 7 and earlier.

   To continue using Parallels Desktop for Mac in OS X Mavericks you should buy a full license for Parallels Desktop 10 for Mac: http://www.parallels.com/store/
2. **Parallels Desktop 8 for Mac**

   The latest update of Parallels Desktop 8 for Mac does support OS X Mavericks (excluding OS X 10.9.5) and is available to address the majority OS X Mavericks compatibility issues. There are some known issues such as USB devices assignment, limited multiple displays support.

   Please make sure that you have the latest update by downloading it here.
3. **Parallels Desktop 9 for Mac**

   Full OS X Mavericks feature set support in Parallels Desktop 9 for Mac.
4. **Parallels Desktop 10 for Mac**

   Full OS X Mavericks feature set support in Parallels Desktop 10 for Mac.
