How can I check the version, edition and build number of Parallels Desktop?

- Parallels Desktop for Mac Standard Edition
- Parallels Desktop for Mac Pro Edition

Information

To check the current version and build number of Parallels Desktop, follow these steps:

1. Start Parallels Desktop.
2. From the **Parallels Desktop** menu (on the left side of Mac menu bar) select **About Parallels Desktop**:

Alternatively, you can find it by clicking on the icon (on the right side of Mac menu bar), then choosing **About Parallels Desktop** from the drop-down list.

3. The **About Parallels Desktop** window displays the build number and Parallels Desktop version.

You can always find the latest build of Parallels Desktop at parallels.com/download/desktop/, or download the installation images using the direct download links below:

- Parallels Desktop 12
- Parallels Desktop 11
- Parallels Desktop 10
