Activation of Parallels Desktop for Mac Business Edition

- Parallels Desktop for Mac Business Edition

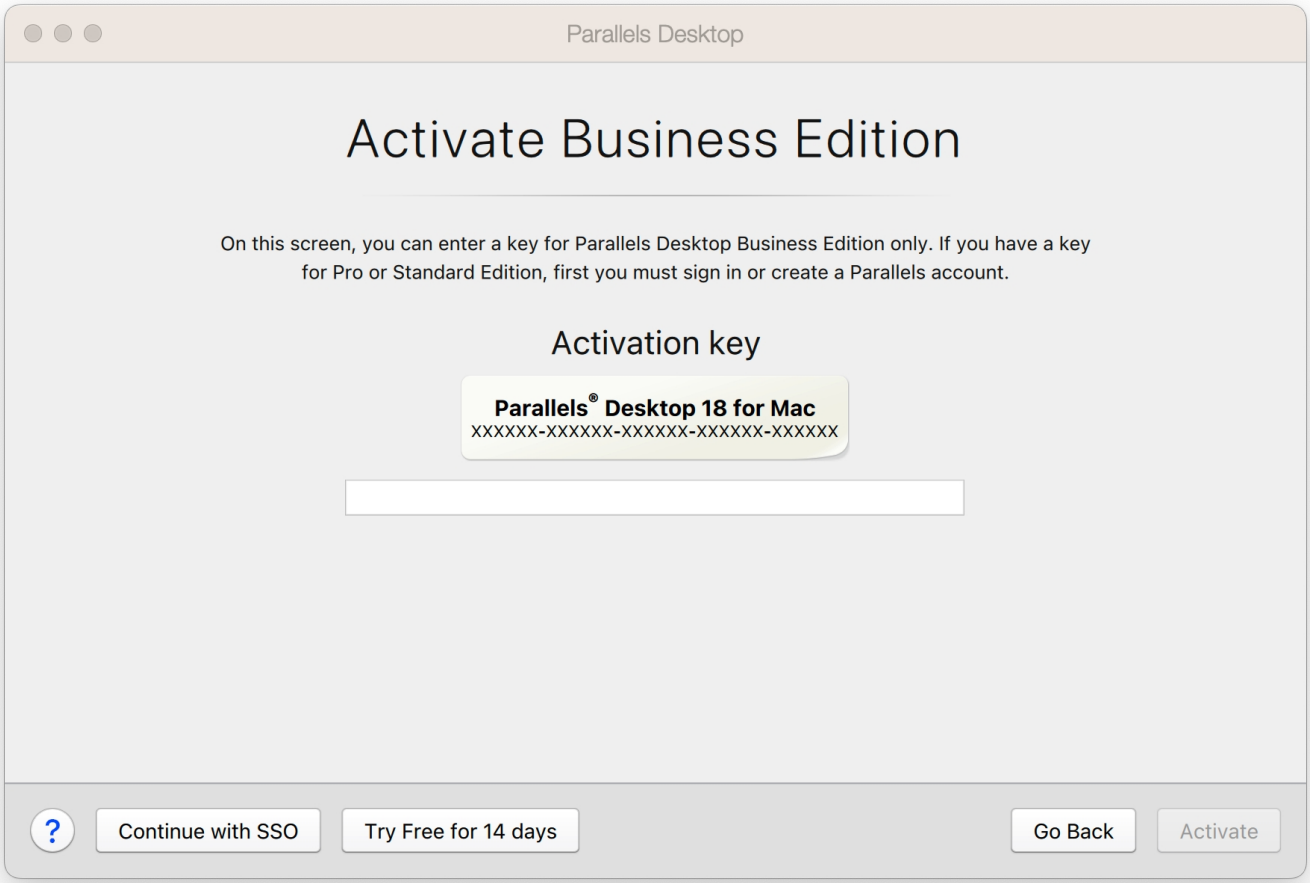
Note: If you are the administrator of the Parallels Desktop for Business account, please note that the license needs to be registered under your account before being used.

Per-device license

These steps apply for cases when you have been provided with a Parallels Desktop for Business license key:

1. Upon starting Parallels Desktop, click **Business Edition**.

2. Enter your license key and click **Activate**.



If your Mac is connected to the Internet, Parallels Desktop for Mac Business Edition will be activated.

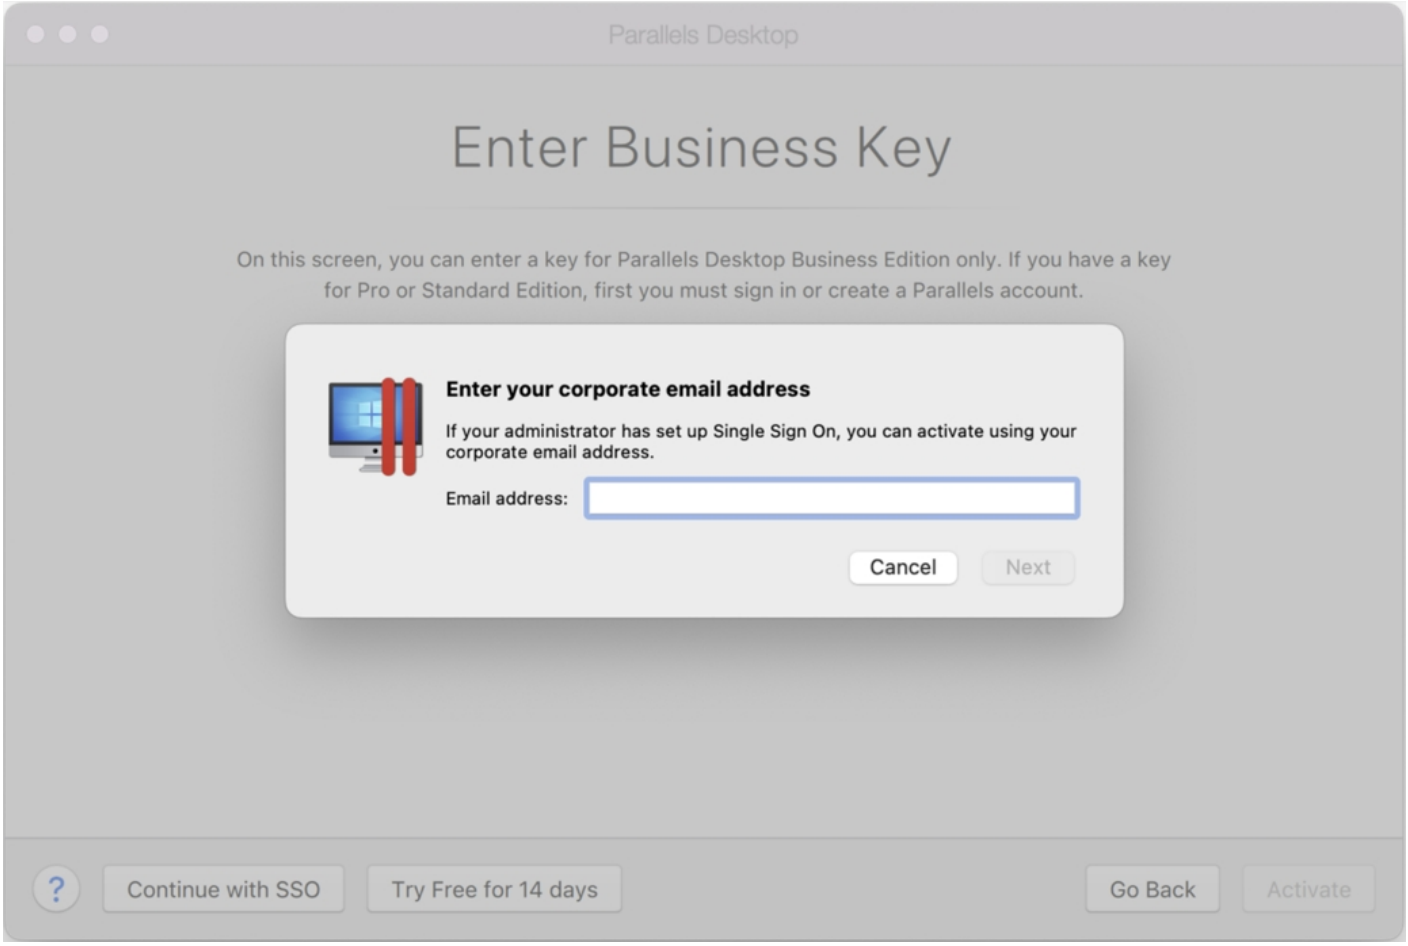
Note: If you are the account administrator, please review KB 124428 to find out how you can invite users to install and activate Parallels Desktop via My Account.

Per-user license

Starting with Parallels Desktop 18 you have an option to use a per-user license to work with your organization's identity provider. Learn more about the license at KB 129133.

1. Download and install Parallels Desktop for Business using this link: https://parallels.com/directdownload/pd?experience=sso

2. Once you run the application, you will be prompted to enter your corporate email address:



3. Once enter the email address and click **Next** and confirm the sign-in, the Parallels Desktop will be activated.
