Mouse does not work in Windows: troubleshooting mouse issues

- Parallels Desktop for Mac Standard Edition
- Parallels Desktop for Mac Pro Edition

Symptoms

- Mouse is not properly (or entirely) functioning in a virtual machine
- Third-party mouse drivers' related issue

Resolution

• Mouse is not properly (or entirely) functioning in virtual machine:

<u>#112939</u> Mouse and keyboard drivers in Windows Virtual Machine

<u>#112076</u> Mouse synchronization does not work between Mac OS and Virtual Machine
Third-party mouse drivers' related issues:

#5853 Problem with Logitech keyboard and mouse after Parallels Desktop upgrade

<u>#114322</u> Unable to use **Logitech Performance MX** mouse back button in Internet Explorer in Windows VM
