

## How to detect Cisco AnyConnect as installed application in Application Portal of Parallels Mac Management for Microsoft SCCM

- Parallels Mac Management 3.0
- Parallels Device Management
- Parallels Mac Management 3.1

## **Symptoms**

How to detect Cisco AnyConnect as installed application in Application Portal of Parallels Mac Management for Microsoft SCCM?

## Resolution

- 1. Click on application with AnyConnect in **Software Library -> Overview -> Application Management -> Applications**.
- 2. Open **Deployment Types** tab in the bottom pane.
- 3. Right click on AnyConnect deployment type and click **Properties** in opened context menu.
- 4. Open Deployment Method tab in {AnyConnect} Mac OS X Properties dialog.
- 5. Select rows with Package IDs:

```
com.cisco.Cisco-AnyConnect-DART
and
com.cisco.Cisco-AnyConnect-Secure-Mobility-Client
values in Clause column.
```

- 6. Click **Delete Clause** button.
- 7. Click **OK** in {AnyConnect} Mac OS X Properties dialog.
