# Limiting instances of published applications due to licensing restrictions

- Parallels Remote Application Server 19.1
- Parallels Remote Application Server 18.3
- Parallels Remote Application Server 18.0
- Parallels Remote Application Server 18.2
- Parallels Remote Application Server 19.0
- Parallels Remote Application Server 18.1

## Description

Parallels Remote Application Server includes an option which allows an administrator to limit the number of times a particular published app can be launched by Parallels Clients.

This functionality is particularly useful when published software has licensing limitations. In addition to limiting the number of times an application can be launched, an administrator can set the action to be executed when the limit is exceeded.

Follow these steps to set the configuration:

1. Open the Console > **Publishing** pane.
2. Select the app in question > Advanced tab > **Licensing Setting**.
3. Change the concurrent licenses value to **1**.
4. Select the action to execute when the limit is exceeded.
