

Parallels Access Web Console: how to copy-paste text?

- Parallels Access
- Parallels Access for Business

Question

- I am using Parallels® Access™ Web Console and I need to copy text from local machine to the remote one (and vice versa).

Answer

For transferring text data from local clipboard to remote computer's please use **Remote Clipboard** tool on the **Parallels Access Web Console toolbar**:

Once the text is pasted to the **Remote Clipboard** it will be automatically saved in the remote machine's clipboard.

NOTE: Text data can be copied only using Parallels Access Remote Clipboard.

Reverse Text Transfer

When you need to copy text from remote computer to your local machine, just copy text on the remote computer as usual - the text will appear in the Remote Clipboard window:
