

How to uninstall Remote Application Server?

• Parallels Remote Application Server

Question

How to uninstall Remote Application Server completely?

Answer

For complete uninstallation, follow these steps:

1. From Application Wizard in Control Panel uninstall Parallels Remote Application Server

- 2. Check **Program Files (x86)** folder > remove **Parallels** directory (if persists)
- 3. In the Registry Editor:
 - ◆ From **HKLM\Software** remove Parallels registry key
 - ◆ From **HKLM\Software\Wow6432Node** remove Parallels registry key
- 4. Reboot Windows Server to apply the changes.

Uninstalling specific component

Should you need uninstall only one component, (for example, RD Session Host Agent):

In RAS Console go to Farm > RD Session Hosts > right-click on appropriate server > Check Agent... > Uninstall

- 1. Open services.msc
- 2. Find the service you want to uninstall (RAS RD Session Host Agent), right click on it > Properties
- 3. Take note of the path and name of the executable, for example: "C:\Program Files (x86)\Parallels\ApplicationServer\2XAgent.exe"

- 4. Open Command Prompt and navigate to C:\Program Files (x86)\Parallels\ApplicationServer\
- 5. Run the command in Command Prompt in the path above:

2XAgent.exe -u

Γhis will uninstall the	e service.
