How to clear credentials stored on RDP Client?

- Parallels Remote Application Server 19.1
- Parallels Remote Application Server 18.3
- Parallels Remote Application Server 18.2
- Parallels Remote Application Server 18.0
- Parallels Remote Application Server 19.0
- Parallels Remote Application Server 18.1

Question

How to clear credentials stored on RDP Client?

Answer

The only way is to untick the "**Save Credentials**" button to have the client ask for the password at every logon.

However there is currently no such option for the username, so the last username will be remembered.
