

## How to add a Mac to Organizational unit using Task Sequence

- Parallels Device Management
- Parallels Device Management 4.5
- Parallels Mac Management 7.0
- Parallels Mac Management 5.0
- Parallels Mac Management 6.0

### Information

Please follow the steps below to create a new Task Sequence for joining a domain and to add the Mac to an appropriate **OU (Organizational unit)**:

1. Create a new Task Sequence: Go to **SCCM > Software Library > Right click on Task Sequences > Create a new Task Sequence for Mac**.
2. Right click on the created **Task Sequence > Edit > Add > Join Domain**.
3. Specify the **OU** in the **Organizational unit** field.
