

How to collect Management Point Log Files?

- Parallels Device Management

In some of the cases Support Team can ask you to provide logs from Management Point.

To do so, on the machine where the Management Point is located please collect the files named **MP_*.log** from the following directory:

`HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\CCM\Logging\@Global\LogDirectory`

For more information please refer to:

[Technical Reference for Log Files in Configuration Manager](#)
