

I have multiple external displays. How can I assign only two of them to the virtual machine in Full Screen?

- Parallels Desktop for Mac Pro Edition
- Parallels Desktop for Mac App Store Edition
- Parallels Desktop for Mac Business Edition
- Parallels Desktop for Mac Standard Edition

Question

Is there a way to keep one of my displays on the Mac side while other displays are assigned to the virtual machine in Full Screen?

Answer

It is not possible to select which displays to use with a virtual machine, you can either use one display or all of them in Full Screen.

More information on using Full Screen with multiple monitors is available in this article:
