

## **Deactivating a Parallels Remote Application Server farm**

• Parallels Remote Application Server

## Information

To deactivate a Parallels Remote Application Server farm, log in to your Parallels account.

Open the **Parallels Remote Application Server** menu and go to the appropriate **Farms** page depending on what license you use - with post-paid or pre-paid billing.

On the list of Farms, select the one with proper name and "Active" status:

Once proper Farm is selected, click Actions > Deactivate:
After clicking Deactivate on above dialog window, the procedure will be confirmed and you will get notification about it's success:
Now you can use your license key for activating another Parallels Remote Application Server farm.  © 2024 Parallels International GmbH. All rights reserved.
