Symptoms

How to distribute Secunia CSI Agent for Mac using Software Distribution

Resolution

- 1. Copy the Secunia CSI Agent for Mac (csia) to a preferred location on the server.
- 2. Create a Software Package, specifying that location as a **Source folder** in **Specify information about this package** page of **Create Package and Program Wizard** dialog.
- 3. In the **Specify information about this standard program** page of **Create Package and Program Wizard** dialog:
 - Copy and paste the following command in the **Command line** field:

chmod +x ./csia && ./csia -i && ./csia -c

- ♦ Set Run mode to Run with administrative rights
- 4. Finish the package creation and proceed with the deploying as described in <u>Parallels Mac Management</u> <u>Administrator Guide</u> page 116-117.
