

File copying from local MacOS folder is not working

• Parallels Remote Application Server

Symptoms

Unable to copy items from a local folder on a Mac to a published network folder.

Cause

This functionality currently is not supported in Parallels Client for Mac.

Workaround

Please use drive redirection and copy the files directly in session:

- 1. Right click on Connection > Connection Properties > Local Resources > tick Disk drives.
- 2. Hit on **Configure...** in order to specify the desired local folder to be redirected in session.
