Parallels Mac Management components system requirements

- Parallels Mac Management 6.1
- Parallels Mac Management 6.0
- Parallels Mac Management 7.0

Information

Minimal system requirements for Parallels Mac Management components are:

- **CPU:** quad-core 2 GHz or faster CPU
- **Memory:** 4 GB of available memory
- **Disk space:** 20 GB of available disk space
- **OS:** Windows Server 2008 R2 and higher

Note: With release of SCCM 1702 Microsoft has deprecated Windows Server 2008, so in order to be future proof it's recommended to use Windows Server 2012 or above.
