## || Parallels<sup>®</sup>

## **Chrome App USB Redirection**

• Parallels Remote Application Server

## Symptoms

USB devices are not being redirected into remote session via Chrome OS Client..

## Cause

Limitation of Chrome API.

To mount a USB device it's device ID should be known,

There was no way to enumerate the attached devices and for example mount all USB drives.

**NOTE**: <u>No new features will be implemented for Chrome Client, due to dropping support of Chrome Apps by</u> Google in 2022.
