

How to enforce "Check for updates on startup" feature on clients

• Parallels Remote Application Server

Information

This article describes, how to enable the "Check for updates on startup" feature at Parallels Client via RAS Policies.

Instruction

- 1. Make sure that you have enabled the "Check for updates on startup" feature in RAS Console> Policies> Policy> Options> General:
- 2. Select a user or users group in your Active Directory for whom this **Policy** will be applied.
- 3. Press **OK** button and close **Policy Properties** window.
- 4. **Policy** will be applied on the next user's login and Parallels Client will check updates availability upon the next launch. Should you need to force this, close Parallels Client via **File > Exit** and restart it.
