

Unable to install Vagrant plugin for Parallels Desktop

- Parallels Desktop for Mac Standard Edition
- Parallels Desktop
- Parallels Desktop for Mac Pro Edition
- Parallels Desktop for Mac Business Edition

Symptoms

When I try to install Vagrant plugin for Parallels Desktop as described in https://parallels.github.io/vagrant-parallels/docs/installation/

I get the error message:

ERROR: Failed to build gem native extension.

Cause

It is required to have Xcode Command Line Tools installed for a proper Vagrant provider work which are not installed on your computer at the moment.

Resolution

1. Run the following command in Terminal to install Xcode Command Line Tools:

```
xcode-select --install
```

2. Then proceed with Vagrant installation.
