

Use clipboard history in Windows 10 October 2018 Update (1809)

- Parallels Desktop for Mac Standard Edition
- Parallels Desktop
- Parallels Desktop for Mac Pro Edition
- Parallels Desktop for Mac Business Edition

Information

New Windows 10 update brings convenient feature to the clipboard - clipboard history. As Microsoft [says](#): "Not only can you paste from the clipboard history, but you can also pin the items you find yourself using all the time. This history roams with you using the same technology that powers Timeline, which means you can access your clipboard across any PC."

Clipboard history is invoked by pressing **Win+V** keyboard shortcut in Windows, but Parallels Desktop converts **Win+V** to **Ctrl+V** by default to ease copy-paste process.

If you want to use clipboard history, please add a new keyboard shortcut at Parallels menu > Preferences... > Shortcuts > Windows 10 > Click + > map **Option+Cmd+V** to **Win+V** as it's done on a screenshot below and click OK:

Now you can open clipboard history in Windows using Option+Command+V keyboard shortcut.
