

How to create collection of MDM enrolled Macs

- Parallels Mac Management 7.3

Question

How to build SCCM Device collection containing PMM MDM enrolled Macs?

Resolution

1. Launch SCCM Console and proceed to "Assets and Compliance" "Device Collections"
2. Press "Create" "Create Device Collection";
3. Give it a name and specify "All Mac OS X Systems" as a limiting collection, click "Next":

4. Click "Add Rule" "Query Rule":

5. Give the rule some name and click "Edit Query Statement";

6. Click on "Show Query Language" and paste the code below:

```
select  
SMS_R_SYSTEM.ResourceID, SMS_R_SYSTEM.ResourceType, SMS_R_SYSTEM.Name, SMS_R_SYSTEM.  
from SMS_R_System where SMS_R_System.ClientVersion like "%-PMA" and  
SMS_R_System.AgentName like "PMM_MDM_DISCOVERY_AGENT"
```

7. Click "OK", "Next" and "Close";

8. Wait for the collection to update its members.
