

Restricting Access by Parallels Client Type and Build Number

• Parallels Remote Application Server

Information

If you'd like to restrict access to the farm by Parallels Client type and/or build number, please do the following:

1. Go to RAS Console Connection Allowed Devices and change the mode to Allow only the selected clients to connect to the system or Allow only the selected clients to list the published items depending on your needs:

2. Disable checkboxes for the clients you want to prevent from connecting on any conditions:
