

It's impossible to view FileVault 2 Disk Encryption report in SCCM

- Parallels Device Management

Symptoms

It's impossible to view **FileVault 2 Disk Encryption** report in SCCM, error **Cannot impersonate user for data source 'DataSource1'. (rsErrorImpersonatingUser)** is thrown:

Resolution

Please do the following to resolve the issue:

1. Select **FileVault 2 Disk Encryption** report in the list of **Reports** in **SCCM Console**;
2. Right click on the report and click **Edit** in the opened context menu;
3. Wait for Report Builder to start;
4. In opened **FileVault 2 Disk Encryption - Microsoft SQL Server Report Builder**: expand **Data Sources** node in **Report Data** pane (at the left);
5. Right-click on **DataSource1** and click **Data Source Properties** in the context menu:

6. On **General** page of opened **Data Source Properties**: see which data source is selected. Looks like */ConfigMgr_T15/ {39B693BB-524B-47DF-9FDB-9000C3118E82}*
7. Click **Browse...** button:

8. In opened **Select Data Source**: double click on */ConfigMgr_<site-code>/* and select another data source (looks like *{5C6358F2-4BB6-4a1b-A16E-8D96795D8602}*):

9. Click **Open** button -> **Select Data Source** closed
10. Ensure that just added data source selected in **Data Source Properties** dialog and click **OK** -> **Data Source Properties** dialog closed
11. Click **Save** button and close the **Report Builder**:

Run the report again, now you will see the list of Macs and their FileVault 2 status:
