

The certificate has expired.

- Parallels Remote Application Server

Symptoms

You get warning that SSL certificate has expired when starting a published item in Parallels Client:

Cause

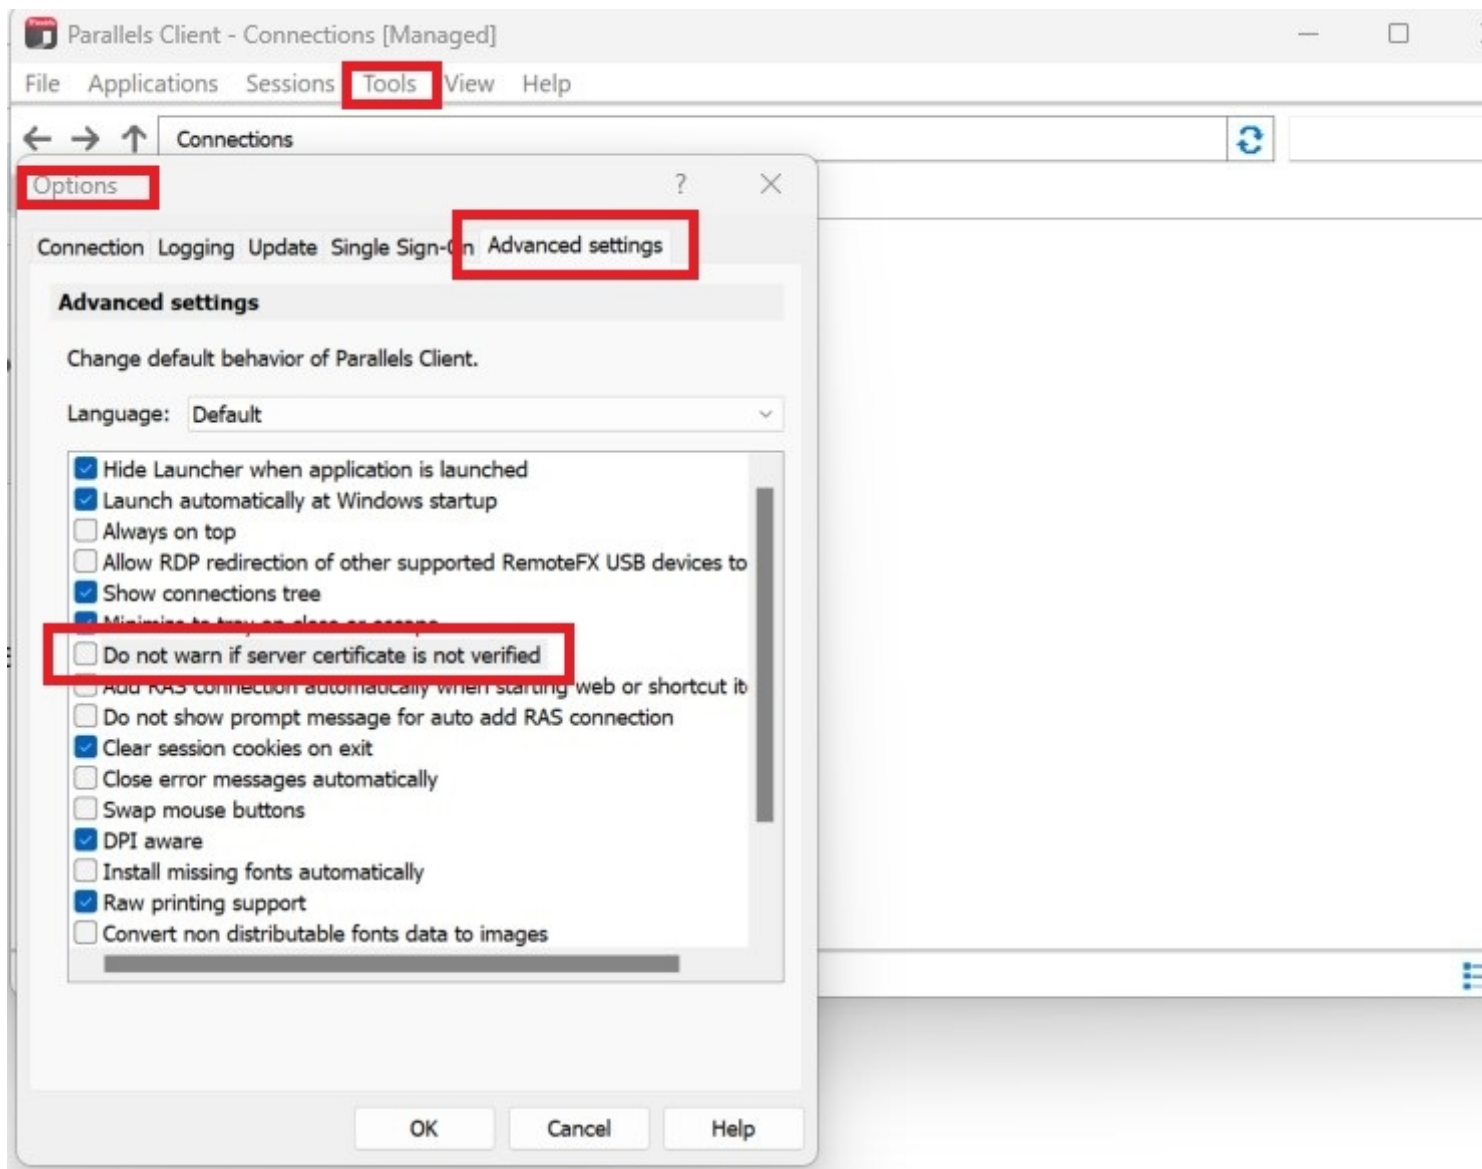

The SSL certificate configured for RAS Gateway or HALBs has expired.

Resolution

Please renew the expired SSL certificate.

Workaround:

This warning can be suppressed by enabling the option **Do not warn if server certificate is not verified** in **Parallels Client Tools Options Advanced Settings**:

If settings are managed by **Client Policies**, please go to **RAS Console Policies**, open the appropriate policy and go to **Client options Advanced Global**. Enable option **Do not warn if server certificate is not verified**, click **OK** and **Apply**:
