

HALB update

- Parallels Remote Application Server

Information

HALB appliances do not support up in-place upgrade unlike other Parallels RAS components.

You need to replace the old appliance with a new one preserving its network settings.

Please follow the steps below to perform the upgrade:

1. Take a note of the current HALB configuration - IP address, subnet mask, Default Gateway, DNS servers and so on;
 2. Go to the Parallels RAS [download link](#) and download the HALB appliance in the appropriate format;
 3. Import it to your hypervisor and assign it to the same network as the old appliance;
 4. Go to **RAS Console** → **Farm** → **HALB** → **Devices** and remove the old appliance;
 5. Shutdown the old appliance;
 6. Configure the new appliance using the settings from step 1;
 7. Add the new appliance to RAS Console and click Apply;
 8. Remove the old appliance from the hypervisor.
