

There is no Program available in the drop-down menu when you add step Install Package to Task Sequence

- Parallels Device Management

Symptoms

There is no **Program** available in the drop-down menu when you add step **Install Package** to **Task Sequence**:

Cause

The program of the package isn't allowed to run when no users are logged on.

Resolution

Please set the **Program can run** property of the program on its **Environment** tab to **Whether or not a user is logged on**:
