

Virtual machine imported from Boot Camp starts with BSOD

- Parallels Desktop for Mac Business Edition
- Parallels Desktop for Mac Pro Edition
- Parallels Desktop for Mac Standard Edition

Symptoms

After importing my **Boot Camp** partition into an ordinary virtual machine it starts with the error:

Cause

Boot Camp is stored on a 4K sector drive.

Resolution

The issue has been fixed in the 16.5.0-49183 build.
