

Parallels Desktop and iPad with Apple M-series chip compatibility

- Parallels Desktop for Mac Standard Edition
- Parallels Desktop for Mac Pro Edition
- Parallels Desktop for Mac Business Edition

Does Parallels Desktop for Mac support running on iPad with Apple M-series chip?

Information

Apple has recently introduced new iPad devices featuring **M-series chips**. Despite the fact Parallels Desktop supports running on Mac computers with Apple **M-series chips**, it's not currently possible to run Parallels Desktop on an iPad due to several technical reasons.

However, you can click the **Get updates** button above to receive email notifications regarding the latest updates on this topic.
