

All applications start in the same RDP session

- Parallels Secure Workspace

Symptoms

All applications start in the same RDP session.

Cause

Incorrect Group Policy (GPO) settings.

Resolution

In order to enforce that each app can start in separate RDP sessions, enforce the following GPO on the RDS servers:

Computer Configuration > Policies > Administrative Templates > Windows Components > Remote Desktop Session Host / Connections: Restrict Remote Desktop Services users to a single Remote Desktop Services sessions: Disable.

See [Required group policies for Remote Desktop Server hosts](#) .
