

Supported browsers

- Parallels Secure Workspace

Resolution

Supported browsers:

- Google Chrome
- Microsoft Edge
- Mozilla Firefox
- Safari

As of version 5.3, Internet Explorer was deprecated. Users who still use Internet Explorer, will see a warning once. They will still be able to access the workspace.

As of version 5.4, support is dropped.

To be clear: users who use Internet Explorer within an application session launched through the Workspace, will still be able to do so.

Generally, it's best practice to use the latest browser version available.
