Cannot download Parallels Desktop for Mac

- Parallels Desktop
- Parallels Desktop for Mac Standard Edition
- Parallels Desktop for Mac Pro Edition
- Parallels Desktop for Mac Business Edition

Symptom

I cannot download Parallels Desktop for Mac. The download is taking too much time and I cannot get it installed.

Cause

- Internet speed is slow or the download process gets interrupted because of an unstable Internet connection.
- Non-official download link.

Resolution

1. Check your internet connection speed and stability. If possible, download the installation image on another computer and transfer it to your Mac using USB hard disk/flash drive.
2. Check if you are using valid download link. Visit Downloads for Parallels Desktop page to get downloads for desired Parallels Desktop version.
