How can I rename a computer in Parallels Access?

- Parallels Access
- Parallels Access for Business

Question

I would like to rename a computer I connect to with the help of Parallels Access.

Information

You can rename a computer you connect to from a mobile device or in your Parallels account.

Change a computer's name in Parallels Account

1. Sign in to your account and go to the **Dashboard**. There click on **Remote Computers** menu item presented under Parallels Access product:

2. You will see the **Computers** tab with all the computers you connect to with Parallels Access.

Click on the icon of the machine you would like to rename to make the line editable:

3. Enter a new name and save the changes by clicking on the tick:

Now your computer has a new name in the Parallels Access interface.

Change a computer's name in Parallels Access application on your mobile device

1. Start Parallels Access application on a mobile device.

2. In the list of computers tap on the cogwheel icon under the computer you would like to rename:

3. Enter a new name and then tap on **Rename** to save changes:
