

ERROR: Unable to connect to the Parallels Update site

- Parallels Desktop
- Parallels Desktop for Mac Standard Edition

Symptoms

Parallels Desktop displays the following error:

Unable to connect to the Parallels Update site.

Resolution

1. Check if your Internet connection is working properly, and access to *update.parallels.com* from your Mac is not blocked by any firewall:

- Open the **Terminal** application from **Applications/Utilities/** and paste the command as is into Terminal and hit **Enter**:

```
ping update.parallels.com
```

Press **Control+C** after 10 seconds to interrupt the command.

Normal output should look like:

```
$ ping update.parallels.com
PING abc.dfg.net (11.22.33.44): 56 data bytes
