

ERROR: Unable to revert to the snapshot

- Parallels Desktop for Mac Standard Edition
- Parallels Desktop

Symptoms

Parallels Desktop displays the following error when you try to revert your virtual machine to a previous snapshot:

```
Unable to revert to the snapshot.
```

Cause

The error above means you ran out of free space on your Mac OS X hard disk.

Resolution

Run Disk Utility and make sure there is enough free disk on all volumes. If Macintosh HD volume is almost full, free up some space on it by removing unnecessary files.
