

## **How do I drag and drop or move objects in Parallels Access**

- Parallels Access
- Parallels Access for Business

### **Question**

I want to drag and drop files or move objects in Parallels Access

### **Information**

#### **Mobile device way:**

- Tap on the object you want to move or drag
- Hold your finger on that object until the blue zoom ring completes
- Move your finger to drag the object to the desired location

#### **Computer way:**

- Tap on the cogwheel on the toolbar then tap on "Mouse Pointer"

- Move the mouse cursor to the desired position
- Tap on the "left mouse click" control

- Move your finger to drag the object to the desired location.

**NOTE:** Instead of using "left mouse click" control you can just tap on the object and drag it
