

## How to uninstall Parallels Tools in Linux

- Parallels Desktop for Mac Standard Edition
- Parallels Desktop for Mac App Store Edition
- Parallels Desktop for Mac Pro Edition
- Parallels Desktop for Mac Business Edition

If you need to uninstall Parallels Tools in a Linux virtual machine, we advise you to follow the steps below:

**Note:** While the example is using Ubuntu, these steps should be applicable to other distributions as well.

1. Start your Ubuntu Linux virtual machine.
2. From Mac top menu, select **Devices > CD/DVD > Connect Image...**
3. Navigate to **Applications > Parallels Desktop > Contents > Resources > Tools > select (double-click) `pri-tools-lin.iso` image**  
**Note:** If your Mac is based on Apple silicon, use: **`pri-tools-lin-arm.iso`**
4. Open your home folder in Ubuntu and on the left pane select **Parallels Tools**.
5. Right-click in the middle of the folder and select **Open in Terminal**

6. Run the following command:

```
sudo ./install --remove
```

And enter your sudo password for Ubuntu, tools will be uninstalled.

7. **Reboot** for changes to be finalized.

---

In Parallels Desktop prior to 20.2.0, follow the steps 1-5 but:

Run the following command:

```
sudo ./install
```

1. Select **Remove** and click Next, follow on-screen instructions

2. Select **Reboot** to restart your Ubuntu virtual machine
