How to transfer my Parallels Desktop activation key to another account?

Resolution

1. You would like to change the e-mail address of your existing Parallels account.

Visit this article: KB 116540.

2. You would like a key moved to another person's account.

Only Parallels Customer Service can remove a key from a Parallels account, so that it could be registered under another one.

Please take note of the following when submitting a key transfer request:

1. The request for registration transfer should be submitted by the current owner of the activation key.
2. When the key is removed from the current owner's account, a new owner will be able to register it again. Visit this article for details on the registration process.
