Locate Parallels virtual machine on Mac

- Parallels Desktop for Mac Standard Edition
- Parallels Desktop for Mac Pro Edition
- Parallels Desktop for Mac Business Edition
- Parallels Desktop for Mac App Store Edition

There are several ways to find your virtual machine (VM) on a Mac, which may be required for you in various cases, e.g. transfer a virtual machine, move the virtual machine to another folder, etc.

Locate a VM in Parallels Desktop for Mac Standard/Pro/Business Edition

A virtual machine can be located in Finder via Parallels Desktop Control Center.

• Click on the Parallels Desktop logo on the Mac menu bar > select **Control Center.**

• Right-click the Parallels Desktop application icon in the Dock > select **Control Center.**

In the Control Center, right-click a virtual machine you'd like to find and select Show in Finder.

Locate a VM in Finder

By default, all virtual machines are stored in one of the following folders on the computer:

```
/<username>/Parallels
```

/Users/<username>/Parallels

/Users/Shared/Parallels

Use Finder's search engine to locate your virtual machine.

Type **.pvm** or the machine's name in the search field (to exclude other files, you can change **Kinds** to **Parallels virtual machine**:

Locate a VM in Parallels Desktop for Mac App Store Edition

Parallels Desktop for Mac App Store Edition is a <u>sandboxed application</u>, and by default, the application has no access to the user's folders (except for the "Downloads" folder if granted). Virtual machines are saved in the following directory when installed automatically:

/Users/<username>/Library/Group Containers/4?6364ACTX.com.parallels.desktop.appstore/Shared/Parallels/

Note: Virtual machines from the Free Systems category are saved to the Downloads folder directory.

To open this directory in Finder, click **Go** menu (when Finder is active) in the menubar > select **Go to Folder**.

| Go | Window Help | |
|--|--------------|--|
| Back | | ¥ [|
| Forward | | ቻ] |
| Select Startup Disk on Desktop 🛛 ☆ ೫ ▲ | | |
| 2 | Recents | ት ዙ F |
| ß | Documents | 公 光 O |
| | Desktop | |
| ا 🕁 ا | Downloads | ጊ |
| ı 🗊 | Home | ሪ |
| | Computer | ۍ ፝ |
| \bigcirc | AirDrop | |
| ⊕ I | Network | |
| Δi | Cloud Drive | ራ |
| 69 (| Shared | ት አ S |
| Ă, | Applications | ۍ ፝ አ A |
| ا 🛠 | Utilities | ት |
| Recent Folders > | | |
| Go to | Folder | _ራ |
| Connect to Server % K | | |

Then enter the following path to the field and click Go:

```
~/Library/Group
Containers/4C6364ACXT.com.parallels.desktop.appstore/Shared/Parallels
```

Finder will open a window with the list of your virtual machines.

Locate a VM using macOS Spotlight Search

By default, Spotlight Search indexes all the files on your Mac, including virtual machine bundles.

Find its icon in the right top corner or press Command+space to open Spotlight.

Type in **pvm** (Parallels virtual machine) or just the machine's name.
