

CyberLink PowerDVD crashes and reports program is not running on a Virtual Machine

- Parallels Desktop for Mac Standard Edition

Symptoms

A pop-up appears when opening Cyberlink Power DVD application saying:

```
Sorry, this application cannot run under a Virtual Machine
```

Cause

Cyberlink Power DVD doesn't officially support running in virtual environment.

Resolution

There's not resolution so far until Cyberlink do changes to their product in order for it to support working in virtual machines.
