

Windows Start icon in Mac Dock in Coherence view mode

- Parallels Desktop
- Parallels Desktop for Mac Standard Edition
- Parallels Desktop for Mac Standard Edition 9 and older
- Parallels Desktop for Mac Standard Edition 10

Symptoms

While running my virtual machine in Coherence view mode I am having the virtual machine's separate icon in the Dock which I want to be removed.

Resolution

The Windows Start menu icon was introduced with the release of Parallels Desktop 9 and it cannot be hidden or removed from the Dock in Coherence mode.

But.. In Parallels Desktop 10 we have added an option for hiding this Dock icon available in Parallels Desktop preferences -> General:
