

Parallels offers and promotions

- Parallels Desktop

Symptoms

I received a promo email from Parallels, but when I am trying to purchase the product, I see a regular price without any discounts/I do not see additional applications in my shopping cart.

Information

All Parallels promotions are available for a limited period.

If you follow the purchase link to take an advantage of the promo/offer, but your shopping cart does not have the advertised prices/products, it means that the promo is over.
