

Parallels Desktop keeps functioning automatically

- Parallels Desktop

Symptoms

After upgrading to Yosemite OS the following issues appeared:

- Virtual machine wizard is automatically popped up
- Virtual machine **pvm** file location is automatically opened
- Virtual machine starts automatically
- Virtual machine is asking to stop automatically
- etc.

Cause

Speech Feature enabled

Resolution

1. Open Parallels Desktop but do not start Virtual Machine.
2. Go to **Parallels Desktop > Preferences > Advance Tab**
3. Disable the option "**Speech**"
