

How to create a backup of the current configuration for Parallels Remote Application Server

- Parallels Remote Application Server 19.1
- Parallels Remote Application Server 18.3
- Parallels Remote Application Server 18.2
- Parallels Remote Application Server 18.0
- Parallels Remote Application Server 19.0
- Parallels Remote Application Server 18.1

For Parallels RAS version 16 and above:

- Open **RAS Console > Administration Pane > Settings > Export .dat2** file

For Parallels RAS version 15.5 and below:

- Open **RAS Console > Administration Pane > Backup Tab > Export .dat2** file

To restore the settings from the backup, please import the exported **.dat2** file from the same configuration page.

NOTE: Also you may create [automatic backup of Remote Application Server settings](#)
