

Unable to install RAS components:??You must run this setup with Admin Rights:

- Parallels Remote Application Server 18.0
- Parallels Remote Application Server 19.1
- Parallels Remote Application Server 18.3
- Parallels Remote Application Server 18.2
- Parallels Remote Application Server 19.0
- Parallels Remote Application Server 18.1

Symptoms

- Unable to install RAS components: **You must run this setup with Admin Rights:**

Resolution

1. Run **Command Prompt** as administrator.
2. Navigate to the directory where the installer is located, e.g.:

```
cd %userprofile%\Desktop
```

3. Run the installer executing .msi file name for example:

```
msiexec /i RASinstaller.msi
```
