

New Windows 10 virtual machine flickers

- Parallels Desktop for Mac Standard Edition 11

Symptoms

I created new Windows 10 virtual machine and it is flickering.

Cause

odbccp32.cpl corrupted file.

Resolution

1. Press **Ctrl+Alt+Del** > **Task Manager** > menu **File** > **Run new task...** > Type **cmd** and press **Return\Enter**.

`<p><strong>Note</strong>: Enable <strong>Create this task with administrative privilege</strong>`

`</li>`

`<li>`

`<p>In CMD execute following command one-by-one:</p>`

`<pre>`

`cd \Windows\system32 ren odbccp32.cpl odbccp32.cpl.old`

2. Press **Ctrl+Alt+Del** > **Sign out**.
3. Login back and check the issue.

If the issue still persists, please reach out [Parallels Support](#).
