

Managing auto-renewal of a business subscription

- My Account
-

Important: If a subscription has been purchased from the Parallels online store, it renews automatically by default. You can see the next billing date in the subscription details page.

A subscription that has been acquired through a Parallels Sales representative or Parallels reseller can be renewed online if you turn on auto-renewal for the subscription in the business account.

To manage the auto-renewal status of a business subscription:

1. Open the details page of a corresponding subscription (as described in [Viewing details of a subscription registered in a Parallels business account](#)).
2. There's a Status box with the **Subscription Renewal** property. **On** means the automatic renewal of a subscription is enabled; **Off** means it's disabled.

3. Manage auto-renewal by clicking on the **Turn Off** or **Turn On** button in the Status box.
