

## **How to enable Microphone redirection?**

- Parallels Remote Application Server 14.1

Follow the steps below to enable microphone redirection using **Remote Application Server**:

1. To enable microphone redirection on **Parallels Client** for **Windows**, you need to go to **Connection Properties > Local Resources > Configure remote audio settings > check Enable recording(if available)**.
  2. Confirm that a remote host has **Microphone privacy settings** configured
  3. Enable sound redirection from the server side using the article from **Microsoft Technet:**[Configure Audio and Video Playback on an RD Session Host Server](#)
