

Remote Application Server - Default Settings for Published applications

- Parallels Remote Application Server
- Parallels Remote Application Server 15.0

The **Default Settings** for published applications enables the administrator to change a number of settings for all published applications.

Default Settings are available for the following categories of settings:

1. Shortcuts Page (Publishing> Shortcuts> Edit Defaults)
2. Display Page (Publishing> Display> Edit Defaults)
3. Licensing Page (Publishing> Licensing> Edit Defaults)

When default settings are enabled the settings are disabled and replaced with the default settings.
