

Collecting SCCM debug logs

• Parallels Device Management

Symptoms

Collecting SCCM debug logs

Information

To enable SCCM debug log, please open Command Prompt under administrator account on SMS Provider server and execute the following queries:

reg add HKLM\SOFTWARE\Microsoft\CCM\Logging\debuglogging /f
reg add HKLM\SOFTWARE\Microsoft\CCM\Logging\@Global /v LogLevel /t REG_DWORD /f /d 0

After required logs are collected, it's recommended to disable debug logging:

 $\label{thm:cosoft} $$ \end{cosoft} \end{cosoft} $$ \end{coso$
