

## Where does Parallels Mac Management store FileVault keys?

- Parallels Device Management

### Question

Where does Parallels Mac Management store FileVault keys?

### Information

Keys are located in SQL **PMM\_<site\_code>** database, **Recovery Data** table. Parallels Mac Management does not remove this data even if device record has been deleted in SCCM. During Parallels Mac Management upgrade old data can be moved to **Recovery Data History** table.
